

## INF3320 Evaluation Guideline for Mandatory Assignments

Each assignment will be given a point based evaluation of the hand-in. The points are awarded based on the scale in the table below. In order for an assignment to be accepted, it has to score 2 or higher for each category. Please note that there might be certain cases in which solutions are accepted or rejected regardless of the point based evaluation.

Requirement	Points	Explanation
Compiles	0	Does not compile because of errors
	1	Does not compile because of linking problems solvable by student
	2	Compiles with warnings OR does not compile due to linking problems not solvable by student
	3	Compiles without problems or warnings
Runs	0	Runs not at all or does not do the task
	1	Starts, but breaks after some time or after some specific action due to major error
	2	Starts, but breaks after some time or after some specific action due to minor error
	3	Runs without problem
Solves exercise	0	Good effort but did not get very far
	1	Main parts of exercise solved, but details are missing OR/AND insight seems to be missing
	2	Exercise solved with minor errors/problems
	3	Exercise solved
Code Quality	0	"Spaghetti code" - unreadable
	1	Poor: badly structured, no error/failure handling
	2	Acceptable: readable, sufficiently structured, most/main errors handled
	3	Good: structured, errors handled, efficient, easy readable
Comments	0	None
	1	Repeats code
	2	Bare minimum
	3	Good
